- Problem-solving

PROFESSIONAL TRAINING

Information Technology Excellence Programme (ITEP)

Madhya Pradesh Industrial Foundation (MPIF)

- Completed a one-year intensive skill development program covering programming languages, full-stack development (J2SE, MERN stack), front-end technologies, MySQL, and project management.
- Applied acquired skills through hands-on projects and real-world assignments, showcasing a strong grasp of industry-relevant technologies.
- Participated in collaborative group projects, enhancing teamwork, communication, and problem-solving abilities.

PROJECTS

ATM Management System

Technology : Java (Swing), JDBC, MySQL

Description : I individually developed a simulated ATM system with features like balance inquiry, withdrawal, deposit, PIN change, and mini statements using Java Swing for the UI and JDBC with MySQL for secure backend operations.

Big Bazar E-commerce Application

Technology : HTML, CSS, JavaScript, Bootstrap

Description : I independently developed the Big Bazar E-commerce Application with a responsive single-page interface. The application includes features like product management, an interactive cart system, and basic user authentication, ensuring a smooth and user-friendly shopping experience
